

Smartphone Photography

A night landscape photograph featuring a calm body of water, snow-covered mountains, and a vibrant aurora borealis (Northern Lights) in the sky. The text "Smartphone Photography" is overlaid in the center. The scene is illuminated by the soft glow of the aurora and the ambient light of the night sky, with the mountains and water reflecting the celestial display.

Photography Basics

- **Rule of Thirds**

- Compose photographs with your points of interest at the intersection of the grid lines or along a grid line.
- Most phones will allow you to turn on gridlines in the camera app.

Photography Basics

- **Rule of Odds**
 - Compose photographs with an odd number of subjects to make them more appealing.

Photography Basics

- **Rule of Space**
 - Compose photographs with negative space to create a sense of motion, activity, or conclusion.

Photography Basics

- **Viewpoint**

- Find a unique perspective. Get low to the ground and shoot up or find a higher vantage point and shoot down. Take multiple shots from different viewpoints.

Photography Basics

- **Fill the Frame**
 - Get close so your subject takes up most if not all of your photograph. Cuts out distractions from around your subject.

Photography Basics

- **Make it meaningful**
 - Capture moments that tell stories and evoke emotions.

Photography Basics

- **Zoom with your feet**
 - Your camera's zoom feature can be handy for taking pictures of things that would be physically impossible or unsafe to get closer to. Whenever possible, walk nearer to your subject until you're able to frame just the shot you want.

Photography Basics

- **Exposure**

- Control light in photos to achieve desired brightness, sharpness, and mood.
